

www.nomadic.in

Nomadic stands for strength and reliability.

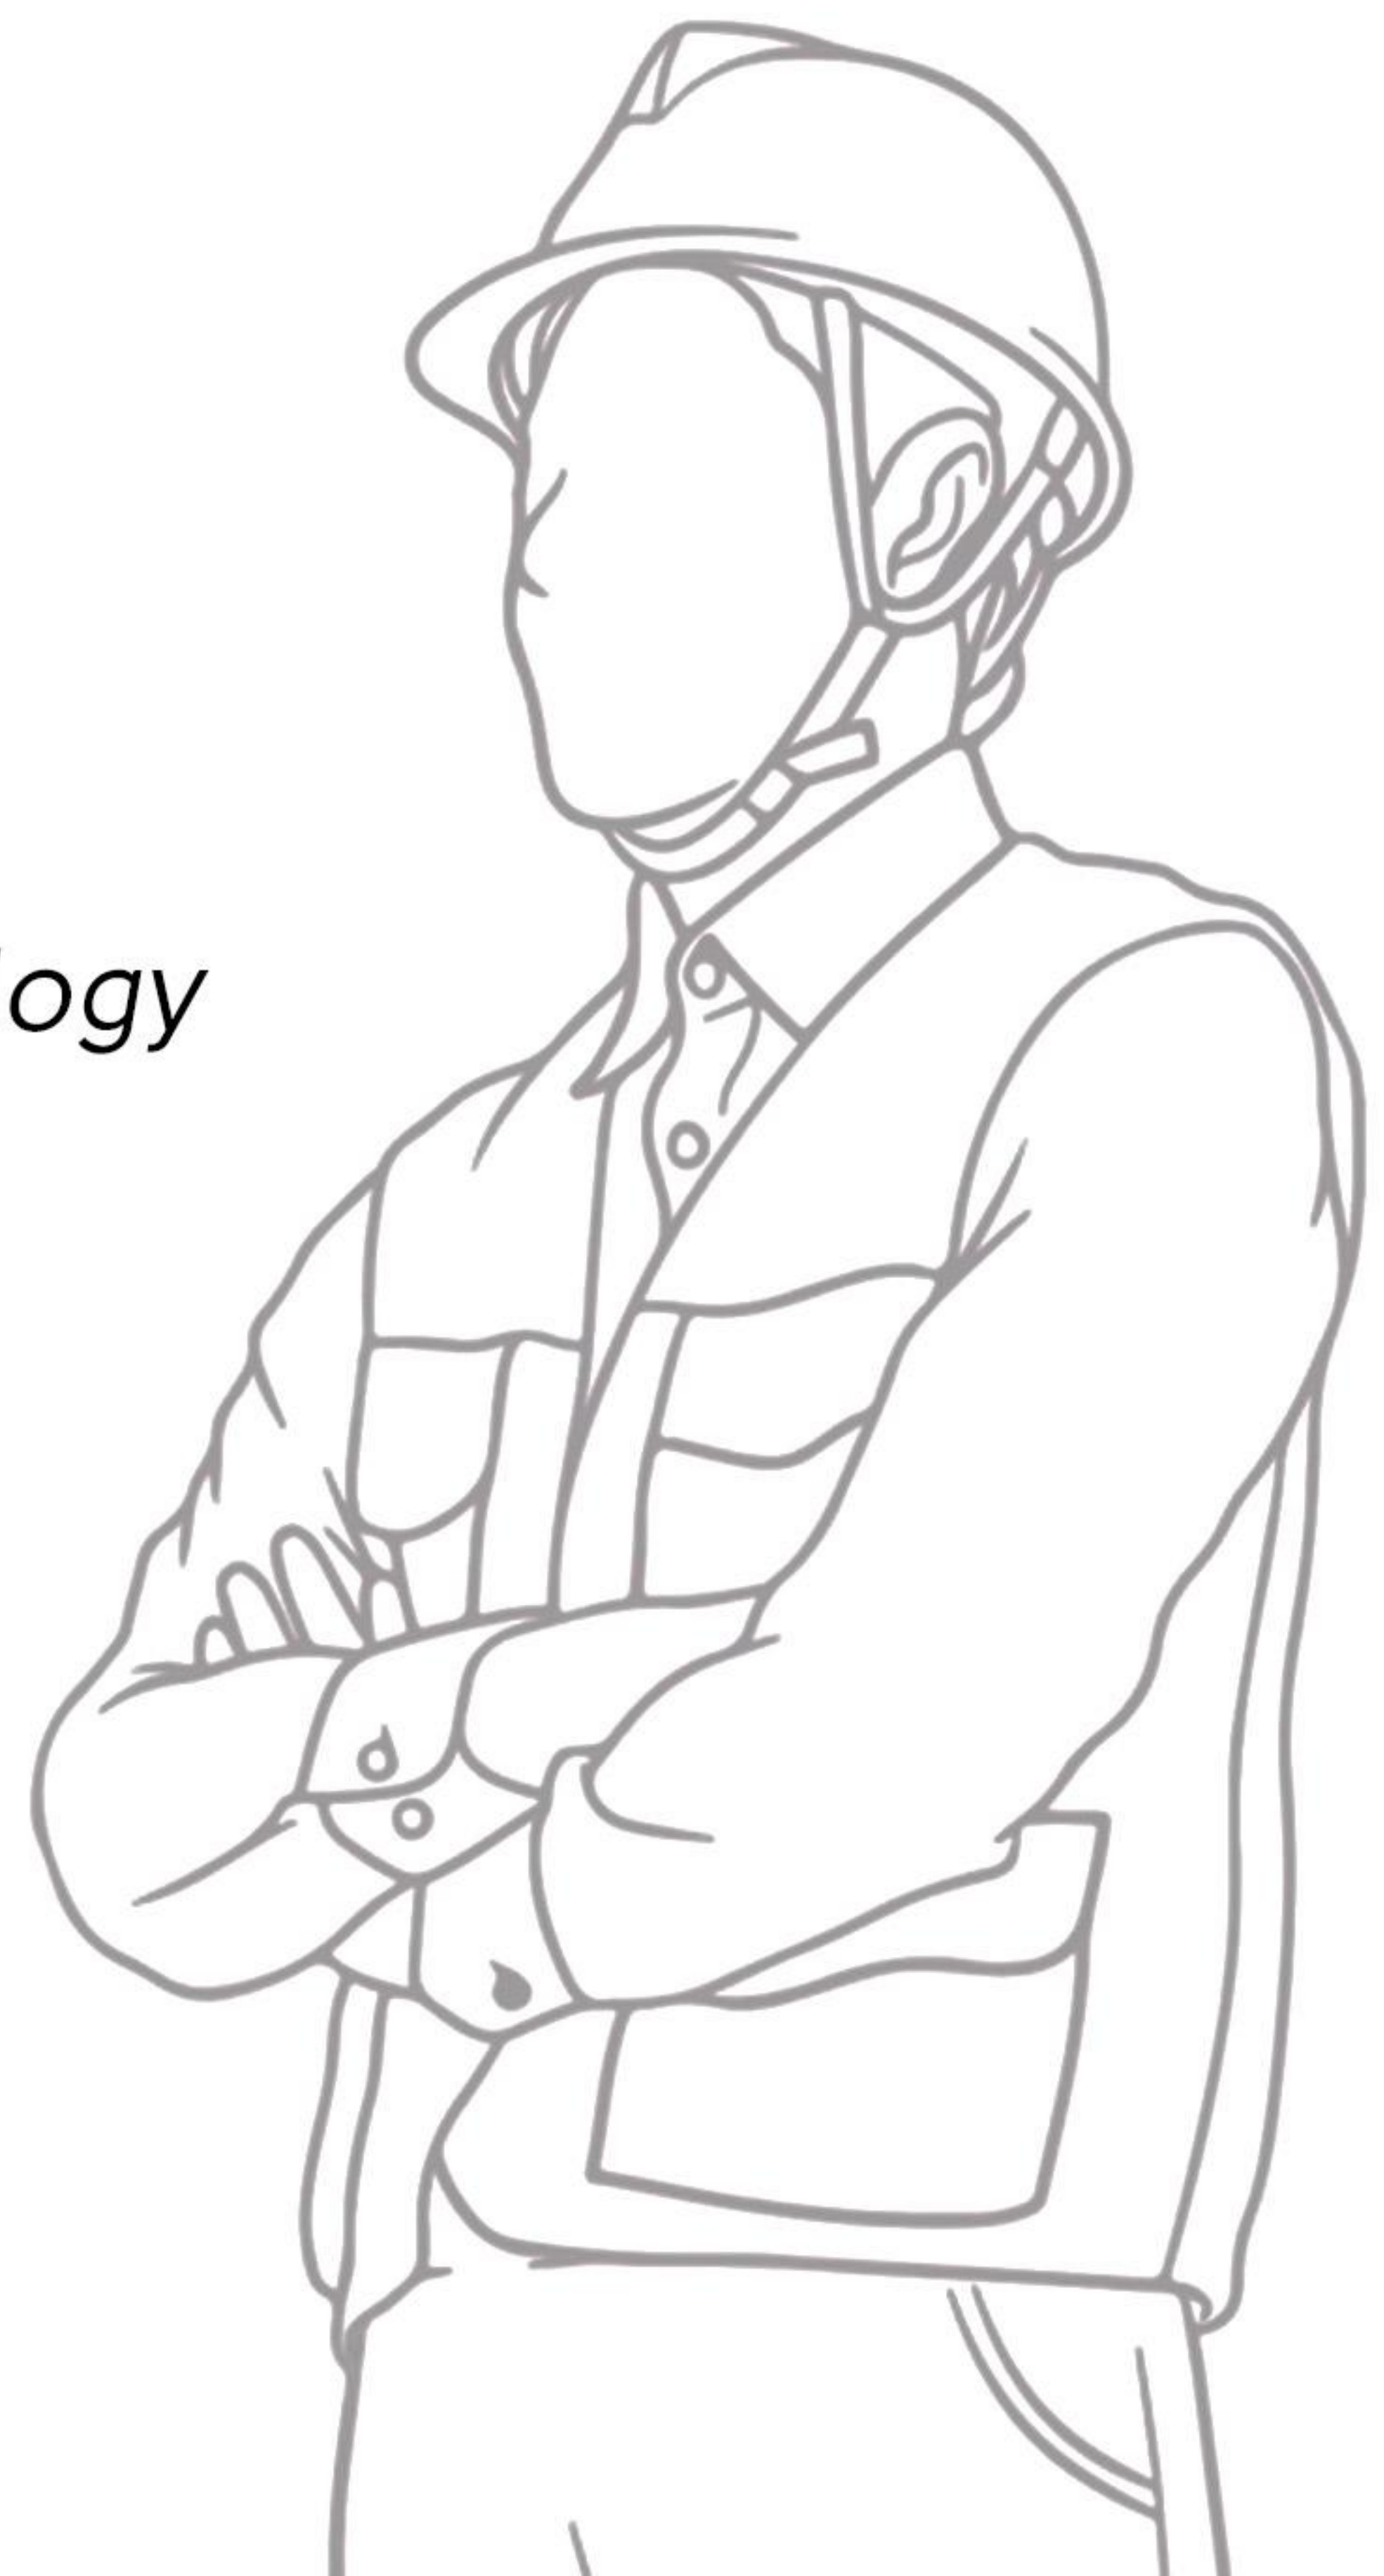

We aspire to empower the front-line workers across the globe. We stand in between them and the tough environments they put themselves into to get things done.

Ensuring their safety is our top priority. We want to build a relationship of trust with them, where our protective wear empowers them - enabling them to unlock their true potential. Building more such relationships of trust inspires us to do better.

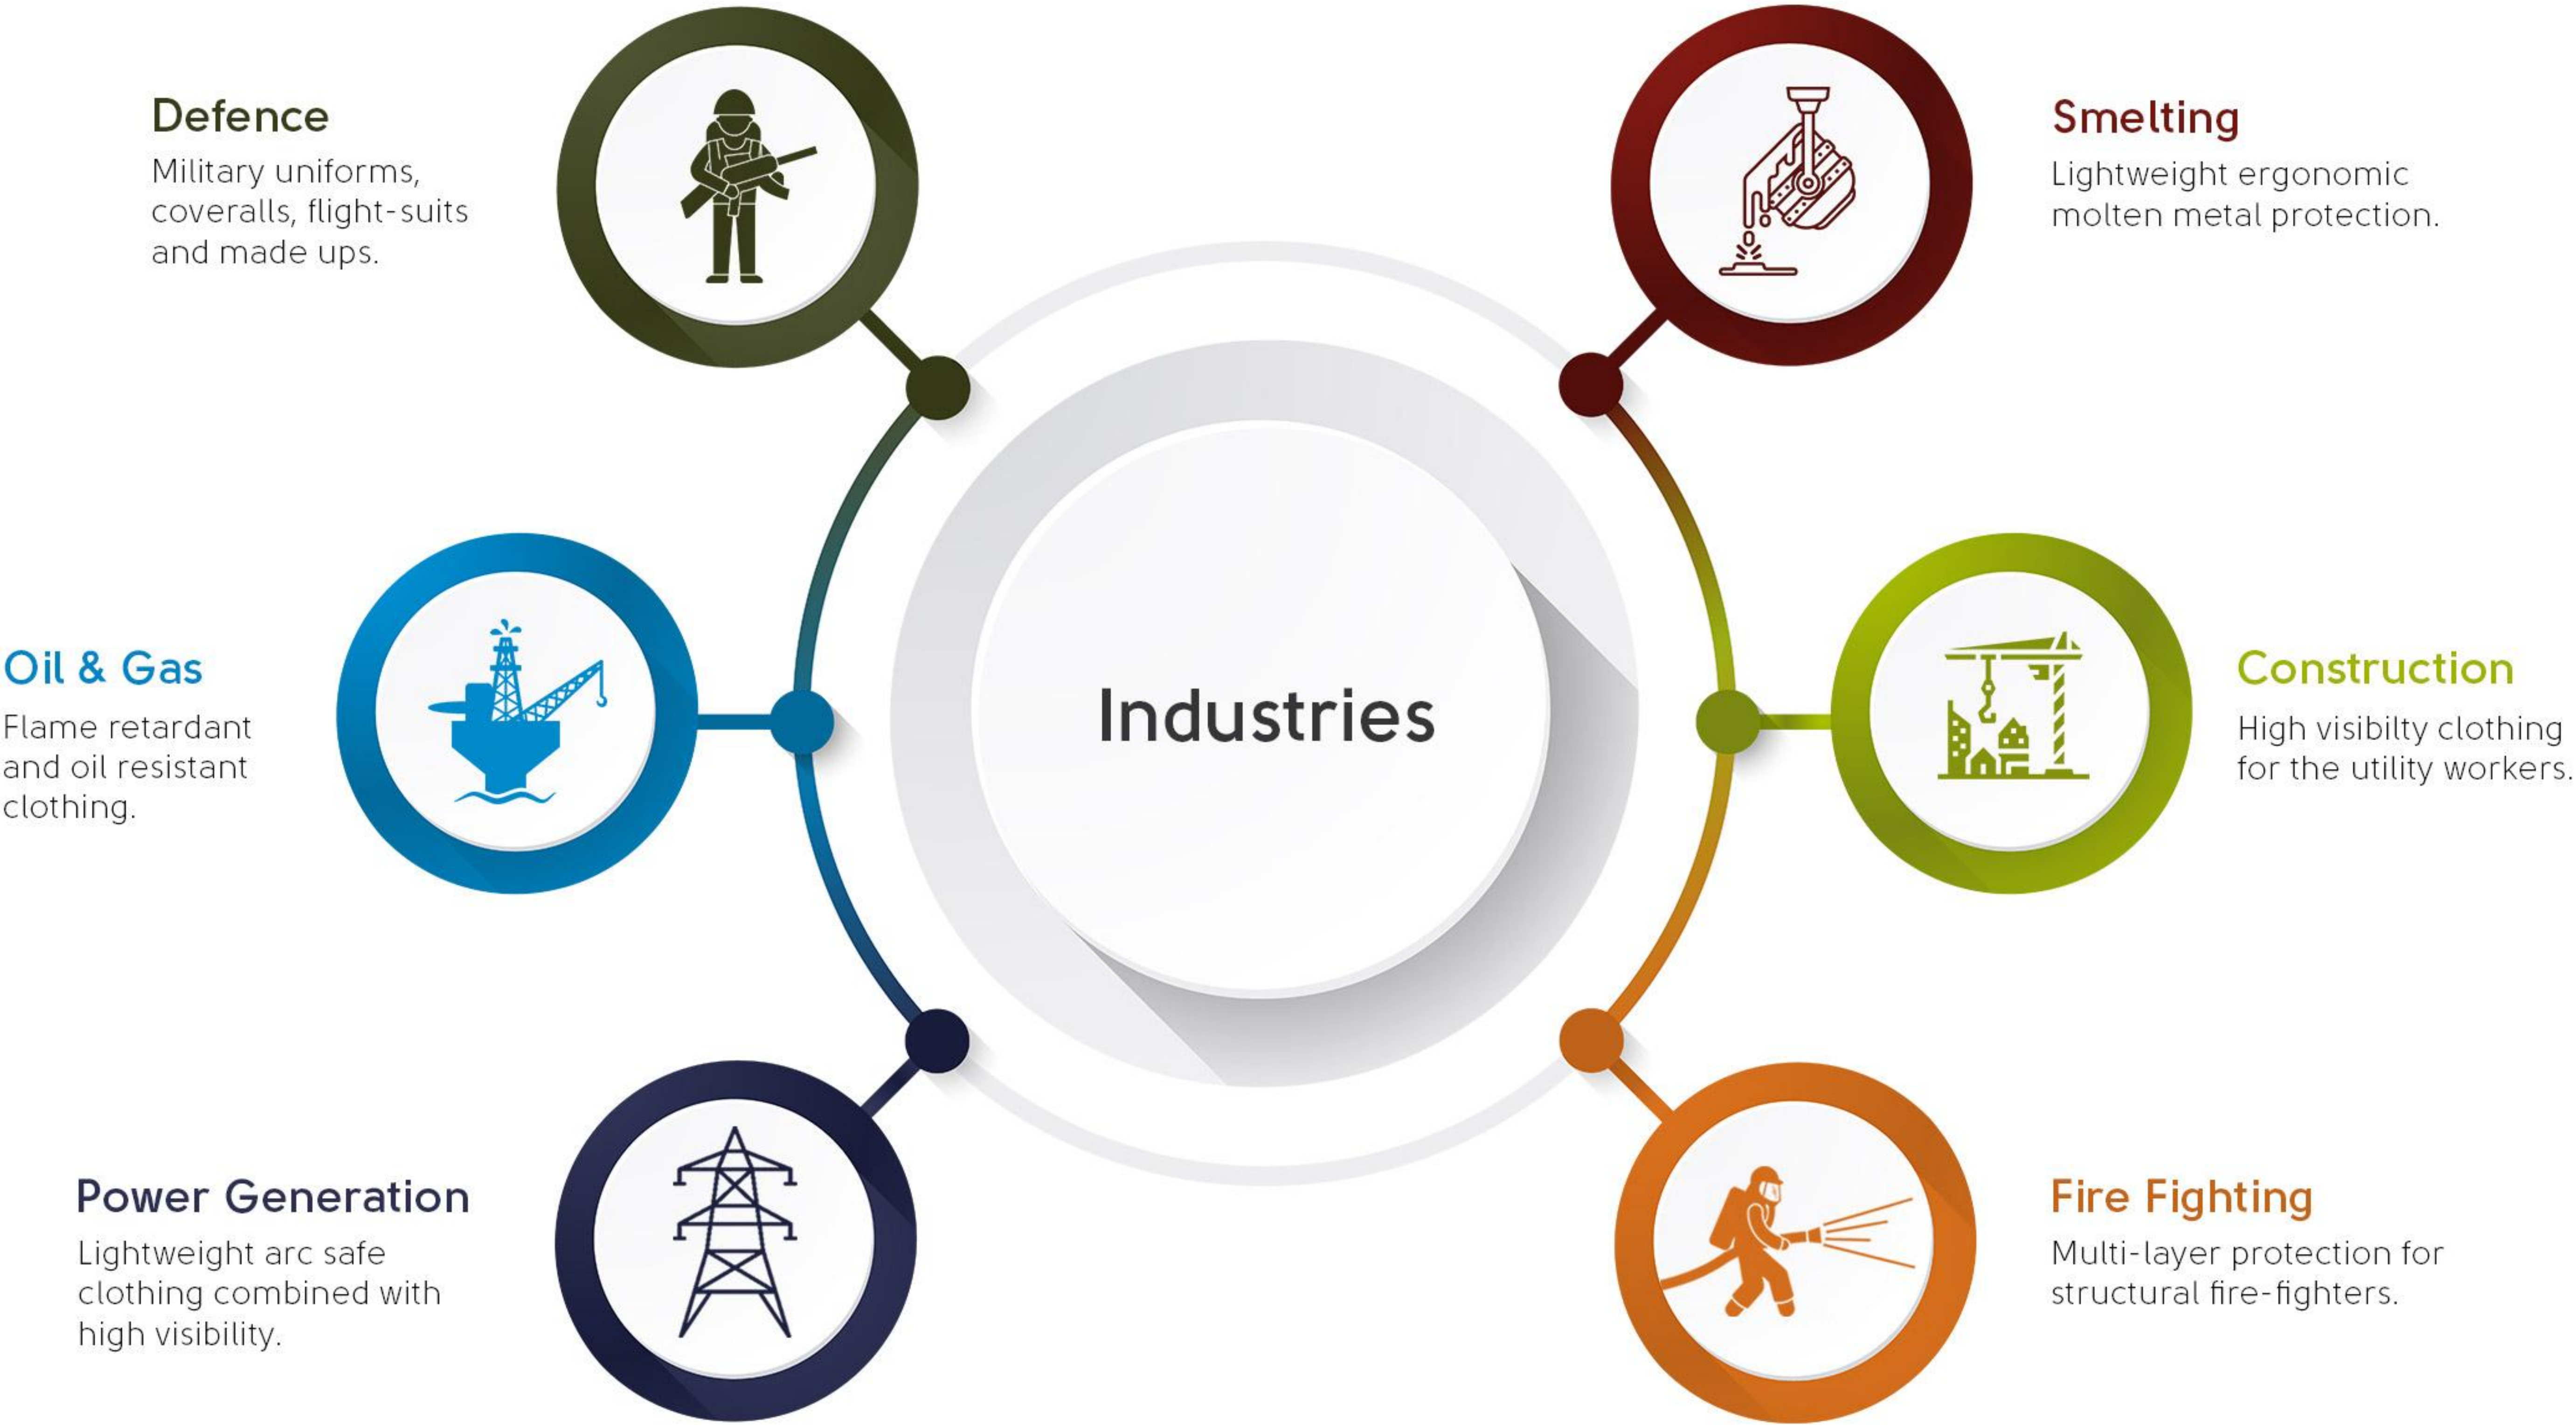

Our product range is ever-evolving. Currently, we are catering to fire-fighters, aluminium foundries, cement plants, oil and gas companies, offshore oil drillers, welders, electricity generators, and more.

We are working with safety standards adopted worldwide like NFPA, EN, AS/NZ and UL. Our garments are certified as per the safety standards from leading research and testing laboratories across the globe. We are constantly working to improve our product offerings, be it in the level of protection that they can provide or in the sustainability of their usage.

“Pioneering textile and apparel technology for human safety”
